

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

ASAPH HALL

CONTENTS

<i>Asaph Hall</i> : DR. HENRY S. PRITCHETT	809
<i>The Life and Work of Joseph Leidy</i> : DR. HENRY C. CHAPMAN	812
<i>The Arc and the Spark in Radio-telegraphy</i> : W. DUDELL	815
<i>Scientific Books</i> :—	
<i>Morgan's Experimental Zoology</i> : DR. C. M. CHILD. <i>Wells's Chemical Pathology</i> : NELLIS B. FOSTER. <i>Salisbury's Physiography</i> : PROFESSOR GEORGE BURBANK SHATTUCK	824
<i>Societies and Academies</i> :—	
<i>Section of Geology and Mineralogy of the New York Academy of Sciences</i> : DR. ALEXIS A. JULIEN. <i>The American Mathematical Society</i> : PROFESSOR F. N. COLE. <i>The Anthropological Society of Washington</i> : DR. WALTER HOUGH. <i>The Chemical Society of Washington</i> : J. A. LEClerc . .	831
<i>Discussion and Correspondence</i> :—	
<i>The Holothurian in Drew's Invertebrate Zoology</i> : PROFESSOR CHARLES L. EDWARDS. <i>The "Census of Four Square Feet"</i> : W. L. MCATEE. <i>Professor Angelo Heilprin as an Artist</i> : EDWIN SWIFT BALCH. <i>Badges at the Meeting of the American Association</i> : DR. CLARENCE L. SPEYERS	833
<i>Special Articles</i> :—	
<i>On the Discovery of Reptilian Remains in the Pennsylvanian near Pittsburg, Pa.</i> : PERCY E. RAYMOND. <i>The Tusks and Size of the Northern Mammoth</i> : F. A. LUCAS . .	835
<i>Current Notes on Land Forms</i> :—	
<i>A Peneplain in the Grand Canyon District</i> : D. W. J. <i>The Istrian Peninsula; Structure, Process and Stage</i> : W. M. D. . .	837
<i>The Twenty-first Session of the Marine Biological Laboratory</i> : PROFESSOR FRANK R. LILLIE	839
<i>Charles P. Matthews</i>	842
<i>The Smithsonian Institution</i>	843
<i>The American Federation of Teachers of the Mathematical and Natural Sciences</i> : PROFESSOR C. R. MANN	843
<i>Convocation Week Meetings of Scientific Societies</i>	843
<i>Scientific Notes and News</i>	845
<i>University and Educational News</i>	848

PROFESSOR ASAPH HALL, one of the most noted of American astronomers, died on November 22 at the home of his son, Professor Angelo Hall, at Annapolis, Maryland, and was buried at Goshen, Connecticut, in the family cemetery on November 25.

Asaph Hall was born in Goshen, Conn., October 15, 1829. His ancestors were among the early English settlers of New England and their names appear in the records of the colonial wars and of the revolution. His grandfather, Asaph Hall, was a captain of the company organized at Cornwall, Conn., which assisted in the defense of Ticonderoga. His father, Asaph Hall, married Hannah Palmer, of Goshen, Conn., and Professor Asaph Hall, who has just died, was the eldest of six children by this marriage.

He received such early education as the youth of his time had access to at the country school and at Norfolk Academy and, after he had become of age, attended college at McGrawville, N. Y. There he met Angeline Stickney, a student and teacher of mathematics at that college, whom he subsequently married and who, throughout her life, gave herself devotedly to him and to his scientific work. Professor Hall's choice of astronomy was largely due to her suggestion and she was the first perhaps to recognize his unusual mathematical ability. After their marriage, they went to Ann Arbor, Mich., where Mr. Hall studied under Brünnow, the well-known
